

Obesity and Fat Aircraft - a Weighty Subject for General Aviation

Dr. Douglas Boyd, PH.D, an active GA pilot, will discuss the importance of Weight/Balance Calculations. Accidents due to exceeding the limits are not too frequent although these accidents carry a high fatality rate. Many factors are involved. Examples of GA Accidents related to aircraft exceeding weight/CG limitations will be presented. It's up to us to get it right!

Directions: Anson Aviation is located South of the Sugar Land Regional Airport main Terminal Building

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
